

# EPA's Policy of Superfund Sites Redevelopment into Recreational Facilities: The Success of Chisman Creek

The screenshot shows the EssayPro website homepage. At the top, there is a navigation bar with the EssayPro logo, links for 'How To Order', 'Reviews', 'About Us', and 'Write My Essay', and user options for 'DBA: EPRO', 'Log In', and 'Sign Up'. The main banner features a student sleeping at a desk with a pen holder. The text on the banner reads: 'WRITING SERVICE AT YOUR CONVENIENCE', 'You - Send us your homework We - Do it all for you', and 'Grab your original paper for just \$10 per page with a free plagiarism report included'. A 'Write My Essay!' button is present. A 'Calculate the price' widget is overlaid on the right, showing options for 'Writing', 'Rewriting', and 'Editing', with 'Writing' selected. It also shows 'Essay (any type)', 'College', '2 weeks', '1 page / 275 words', and 'Double spaces' selected, resulting in a price of '\$11.4' and a 'Write My Paper' button. At the bottom of the banner, it says 'NO MORE SLEEPLESS NIGHTS... 100% PLAGIARISM-FREE ESSAYS. ANY TOPIC OR DIFFICULTY CAN BE HANDLED!'.

## EPA's Policy of Superfund Sites Redevelopment into Recreational Facilities: The Success of Chisman Creek

### Introduction

Superfund sites are located all across the United States and its territories. These sites have been deemed the worst of the worst in terms of environmental damage; they pose a threat to human health and the environment, prior to their remediation. Superfund sites are usually a result of several years of [contamination](#); however, there are some [instances](#) when they are one-time accidents. United States Environmental Protection Agency (EPA) is in charge of Superfund, which is the common term for Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the enforcement of this law in the United States. Superfund was passed in 1980 to establish enforcement surrounding contamination sites in the U.S. and their cleanup. EPA has set up several initiatives and policies that deal with the remediation and redevelopment of these sites. EPA focuses their remediation policies on turning these sites back into productive and useful areas for

the community, whether that reuse is residential, commercial, industrial, or recreational use.

Chisman Creek Superfund [Site](#) in Virginia was chosen as a site that could be successfully remediated into a recreational facility and serve as an example for other site remediation policy makers. The process by which this contaminated old landfill was redeveloped into a phenomenal recreational facility is an example of EPA successfully pulling together several issues and actors to achieve their agenda.

## Issues

Superfund sites could have many different contaminations and remediation characteristics. The characterization of the site should strongly correlate with...
